**Meeting #9**

**Action Item 8-8**

**5-Fruit Case of the Enhanced Test Procedures with the Desired Signal  
Level at 12 dB above MTL**

**Presented by John Van Dongen, FAA Technical Center, ACT-350**

SUMMARY
Response to Action Item 8-8, Re-run 5-fruit case of the Enhanced Test Procedures with the desired signal level at 12 dB above MTL.

In response to action item 8-8 the 5-fruit case of the enhanced test procedures was run with the desired signal level at 12 dB above MTL and the relative fruit level varied accordingly. The following figure shows a graph of the new data compared to the previous data (previous desired signal at -50 dBm).
